What are the serious harms of getting COVID-19 or getting the Pfizer vaccine?

Out of every 1000 people who **get COVID-19**

No hospital but Long-COVID*

127 vs 0

Hospital & Long-COVID

69 vs 0

ICU & Long-COVID:

41 vs 0

Ventilated & Long-COVID:

13 vs 0

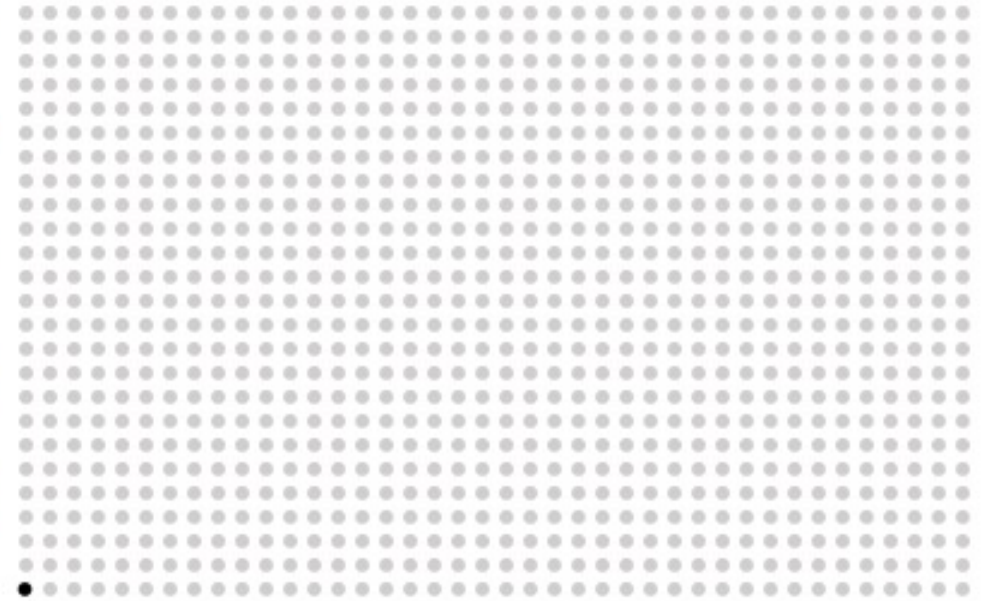

Die from COVID-19

27 vs 0

Serious reaction to vaccine#

0 vs <1

Out of every 1000 people who **have the vaccine**

* Long-COVID is when people have symptoms that last for months or years after COVID-19. We are still learning more about this.

Recent reports have linked the Pfizer COVID vaccine to heart inflammation (myocarditis or pericarditis), particularly in younger people. Estimates vary, but it is likely to be in the order of 0.001 out of 1000 people vaccinated.
